## 👤 WHO AM I?

---

A Passionate Test Engineer with 3+ years of experience in Agile and DevOps projects. Expertise in test design and framework development for automation. Solid background in financial services, banking and Telecom domains. Proficient in automation tools like Selenium, UFT, and Tosca.

## 💼 WHAT I DO?

---

2019 – present

### **Accenture, Test Engineering Analyst**

- Developed an API automation framework with Newman and Concourse integration to enable Continuous Testing and Automatic reporting on Slack
- Performed extensive testing of Microservices and End-to-End testing of Rest and SOAP related services.
- Performed White Box and Grey Box testing on microservices and helped in fixing potential bugs and security vulnerabilities in the earlier stages of SDLC.
- Developed test design frameworks for Order management projects following Devops model in the Telecom services domain.
- Developed VBS, and Excel VBA macros for automating the day-to-day tasks and helped the team save man hours.

2017 – 2019

### **Infosys, Systems Engineer**

- Developed a TestNG Framework with Maven Dependencies in selenium for easy cross browser testing of banking websites.
- Developed a Selenium Grid framework for enabling parallel cross browser testing of banking applications.
- Developed test design frameworks for Online Banking Projects following waterfall and agile process models in the financial services domain.
- Automated the smoke and regression suites for saving manual efforts and designed touchless automation suites.
- Performed exploratory and Ad hoc testing in addition to end-to-end testing and helped the team in finding security bugs.

## 📖 WHAT DID I STUDY?

---

### **MNM Jain Engineering College**

Pursued Bachelor of Engineering in Mechanical Stream and Graduated with a score of 8.2 CGPA.

## 🧠 WHAT ARE MY SKILLS?

---

### **DevOps**

Maven, Gradle, Concourse, Github, Slack, SonarQube, Metrics Center, AppDynamics

### **Quality Assurance**

Functional Testing, Java, Selenium, UFT, TOSCA, SQL, HP ALM, Rally, Jira, Postman
